

*proposes a project to structure within the organization of the client a **System of Environment Management**, in conformity to the principal requisite norms of reference: the norm UNI EN ISO 14001:2004 and the regulation CEE n. 761/2001—EMAS.*

#### ✿ **The System of Environment Management (SGA): what is it?**

The **SGA**, and the relative environment certification, permit an organization to manage its own processes and activities regarding the safeguard of the environment, not only respecting the norms and laws already enforced, but by creating a personalized environmental policy defining the goals, realizing and developing the necessary elements for their attainment, monitoring the continuous improvement of our own environmental efforts, and communicating the results to the outside.

The Quasar S. n. c. supplies assistance for the realization of a System of Environment Management that conforms to the UNI EN ISO 14001 together with EMAS (**E**nvironmental **M**anagement and **A**udit **S**ystem) that conforms to the regulation CEE n. 761/2001

#### ✿ **Norm UNI EN ISO 14001:2004 and/or EMAS: why conform to such norms?**

An **SGA** brings the following strategic advantages: ● environmental and management issues continually under control, reduction of risks and prevention of environmental costs ● better image towards the community (clients, public administration, private, etc.) ● increment of community spirit within the company ● positive publicity and greater options in the market ● increase in company value.

It is a responsible and knowledgeable decision made by the organizations that look for added value in their environmental efforts.

The legislative restriction becomes an opportunity for the market.

#### ✿ **Norm UNI EN ISO 14001:2004 (VISION) for Quality: how does a company conform to such norms?**

Following the **PDCA (Plan-Do-Check-Act)** and in function of company processes with an added environmental value, the **SGA** is defined: ● reexamining and making clear the applicable legislative requests ● realizing a complete initial environmental analysis ● defining objectives and goals V structuring a system of surveillance and measurement ● effectuating internal formation to increase the knowledge and competence of the personnel ● to put into effect a system for the administration of emergencies ● establishing a correct communication with the outside

#### ✿ **Norm UNI EN ISO 14001:2004 (VISION) for Quality: what does Quasar S. n. c. offer?**

Quasar S. n. c. offers its clients: ● necessary technical and administrative assistance, throughout the entire counseling period, to completely install the **SGA** and for the administration of the Organism of Certification ● the carrying out of a complete internal inspection, a simulation of that of the Organism of Certification, after which will be decided the last eventual necessary correctional actions ● assistance during the Inspection of the Organism of certification at the seat of the Organism ● the formation and the training necessary to ensure the Organization can manage its own **SGA** autonomously V The Quasar S. n. c. also offers a conclusive analysis of the strong and weak points of the Client's Organization, supplying suggestions for the **balanced growth in the limitation of risks** ● for the Organizations that wish for a constant comparison with Quasar S. n. c., Quasar S. n. c. offers an **annual assistance and development program**, a follow-up, to decide with the client in function of the specific needs.
