

System of Administration of Health and Safety OHSAS18001

Quasar proposes a project to give value to the organization through the realization of a **System of Administration of Health and Safety on the Job**, in conformity to the norm OHSAS18001

✿ The System of Administration of Health and Safety on the Job: what is it?

The norm **OHSAS 18001** (Occupational Health and Safety Assessment Series) defines a system of administration of Health and Safety on the job, not the security of the products/services. The **OHSAS 18001** defines a "modus operandi", shared and established in the activity of the organization, which goes beyond the formal aspects of the implementations of the Law (626). **The OHSAS 18001** is the only norm in the sector that can be "certified". The structure of the **OHSAS 18001** traces, with diverse finality, like that of all the other better-known norms like the ISO 900.

✿ The System of Administration of Health and Safety on the Job: why conform to the OHSAS 18001?

Within the company there develops an added intangible value that is transferred to the product/service, represented by the dedication of the organization towards Health and Safety on the Job. It is the consolidation of a reputation, it is a qualification, and it is a certification of the existence of entrepreneurial values not only of the economic type, which encounter the favor of slices of the market today particularly sensitive and selective. The valorization of the human patrimony and the improvement of working conditions are becoming a plus of the product/service of the company. The opportunities that we offer are those of a greater aperture and idealization of the market, increase the sense of belonging of the personnel, increases the knowledge and motivation to the development of the company, increases the transparency of internal relations. We open an effective perspective of reduction of the costs for unfortunates job-linked illnesses, of the efficiency of human resources, of prevention of accidental events, of risk control, of monitoring and correct adherence to the current legislation, of better cooperation with competent institutions, and the improvement of the company image.

✿ The System of Administration of Health and Safety on the Job: how to conform to OHSAS18001.

The respect of the laws in place is the base demand of the **OHSAS 18001**. The **OHSAS 18001** in comparison to the laws in place: • emphasizes the research of health and safety on the job • extends participation of the system to all the organization, going beyond the simple definitions of legal responsibility • encourages valuations of efficiency and global efficiency, on all the implied processes, not limited to the final performance and at a level of reliability of conventional presidents.

The System for the continuous improvement of performance develops on two tracks: The Establishment (Politics, Planning, Function), and Maintenance (control and corrective action, reexamination). The monitoring system of the performances is similar to that of other administrative systems (quality, environment), administering objectives of Health and Safety equal to economic and/or qualitative objectives. Moreover the formation and the training of all subjects in the structure is the fundamental element for the Organization to participate in its development.

✿ The System of Administration of Social Responsibility (Ethics): what can Quasar S. n. c. offer?

Quasar S. n. c. offers its clients all the technical and administrative assistance necessary, during the entire counseling period, for the complete activation of **The System of Administration of Health and Safety on the Job** and in the relationship with the Organism of Certification, including assistance during the Inspection of the Organism of Certification at the seat of the Organization, and the capillary formation of all the personnel.

• for the Organizations that wish for a constant comparison with Quasar S. n. c., Quasar S. n. c. offers an **annual assistance and development program**, a follow-up, to decide with the client in function of the specific needs.
